

### **EXAMINER'S AMENDMENT**

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.
2. Authorization for this examiner's amendment was given in a telephone interview with David Sakata (Reg No. 59,949) on August 12, 2009.
3. The claims have been amended as follows:
  - a. Claim 25, line 1, delete insert -- storage -- between "processor-accessible" and "media".
  - b. Claim 26, line 1, delete insert -- storage -- between "processor-accessible" and "media".

### ***Reasons for Allowance***

4. The following is an examiner's statement of reasons for allowance: the prior art of record fails to teach or suggest the claimed invention. Specifically, the prior art of record fails to teach or suggest a switch in an instruction to execute in the alternate execution mode that activates a corresponding hook statement within a cmdlet base class from which commands are derived, wherein the hook statement invokes the method provided by the command line operating environment to execute in the alternative execution mode.

Art Unit: 2193

5. The prior art of record, Wolczko teaches a method of executing each command on a command line in a first execution mode or in an alternate execution mode, wherein executing the command in the alternate execution mode occurs when the command on the command line includes an instruction, the instruction comprises a call to a method provided by the command line operating environment to execute in the alternate execution mode, the alternate execution mode being provided by the command line operating environment such that the command line operating environment provides extended functionality to execute the command and the command being executed on the command line does not incorporate code for extending functionality to execute the command in the alternate execution mode, wherein the instruction to execute in the alternate execution mode also comprises a switch indicating the alternate execution mode. However, Wolczko fail to teach the independent claims as recited where the switch activates a corresponding hook statement within a cmdlet base class from which commands are derived, wherein the hook statement invokes the method provided by the command line operating environment to execute in the alternative execution mode.

6. Any comment considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

***Conclusion***

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jue S. Wang whose telephone number is (571) 270-1655. The examiner can normally be reached on M-Th 7:30 am - 5:00pm (EST).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Lewis Bullock can be reached on 571-272-3759. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
